# **Microsoft Expression Web Introduction/Intermediate**

**Duration: 2 Days**

## **Overview:**

Aspect Training's Microsoft Expression Web Introduction/Intermediate training course provides the foundation for building and maintaining websites that include multiple pages and include images and links. In this class, you'll discover how to create CSS based Web content as well as update and maintain web sites using Expression Web

Attendees then learn how to use templates and incorporate basic interactivity; add rollovers and how to create basic forms for collecting user supplied data. This course then covers more advanced site maintenance.

## **Prerequisites:**

There are no prerequisites for this course. Previous use of the internet would be an advantage

**Continued over...**
